(54) MOVING IMAGE OFFERING SYSTEM

(57)Abstract:

PURPOSE: To obtain moving image information from an interrupted position by storing the position information of a moving image file whose reception is interrupted in the middle way into a moving image position information storage part together with a moving image program name.

CONSTITUTION: A main controller 102, when receiving program request information, retrieves a data base in the moving image position information storage part 201, and reads out the middle completion position of a moving image program offered in the past when a request shows the moving image program interrupted by a user. And by offering the moving image program name and the position information to a moving image position information control part 202, a moving image file device 101 is retrieved, and the content of information from the continuation of a part offered in the past in a designated moving image program is outputted to and displayed on terminal equipment

11 via a line connecting device 103 and a communication channel 12. Thereby, the moving image information can be obtained again from the continuation of the part offered in the past of the moving image program.

LEGAL STATUS [Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
